

ArtWay Tools presents the 1 inch Barrel Extruder

The ArtWay ACE

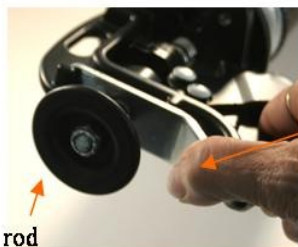

The ArtWay Extruder is designed exclusively
for ArtWay 1 Inch Disk Designs

The ACE is Perfect for the extruder enthusiast
A quality tool for small scale design extrusions:
Perfect for extruding all types
of jewelry components,
Cane construction ,bead making
Over 200 shaped disks available

Your ACE comes fully assembled
The ACE cleanly extrudes polymer clay but ,
should you decide to disassemble and wipe out the parts use a
dry paper towel to remove any remaining product.

NEVER remove the second hex nut on the rod.

To move the rod :
Press on silver lever and at the same time

push in the rod to bring the piston/cup forward to the
mouth of the barrel
In this position you can easily access and remove the hex
nut

If you chose to use an **ArtWay Coring Tool** you now
can unthread the hex nut remove it and thread on the
ArtWay Coring Tool in it's place

To load the extruder : roll sheet of conditioned polymer clay into a log
then

press the silver lever with your thumb and at the same time
pull the rod back

*Place a small piece of deli wrap at the base of the log of clay, this
will assist in the clean
recovery of any unextruded remains of the log of polymer clay

*Insert the ArtWay design disk of your choice, and screw on the
retaing ring

Begin extruding by squeezing the handle with steady even pressure
